

## AMENDMENTS TO THE CLAIMS

This listing of Claims shall replace all prior versions, and listings, of claims in the application:

### LISTING OF CLAIMS:

1. (Currently Amended) A method for analyzing content on a web page comprising:
  - accessing said web page comprising content;
  - processing the web page through a filter, wherein the filter transfers the content of the web page to an analyzer;
  - analyzing the content of the web page at said analyzer, wherein said analyzing is distinct from said processing;
  - returning a result of said analyzing to a server;
  - appending the result of said analyzing to the content of said web page;and
  - displaying said web page and said result.
2. (Original) The method as recited in Claim 1 wherein said accessing said web page comprising content is performed by an application server operating on a first computing system.
3. (Currently Amended) The method as recited in Claim 2 wherein said filter is a function of the application server, and wherein said filter is selectively activated by a webpage development tool accessible to said first computing system.

4. (Original) The method as recited in Claim 2 wherein said server and said filter operate on said first computing system.
5. (Original) The method as recited in Claim 2 wherein said analyzer operates on a second computing system that is communicatively coupled with said first computing system.
6. (Previously Presented) The method as recited in Claim 1 wherein said analyzer analyzes said content of said web page for compliance with Federal law.
7. (Original) The method as recited in Claim 1 wherein said filter transfers content of the web page to the analyzer in a hypertext mark-up language (HTML) format.
8. (Original) The method as recited in Claim 1 wherein said content of said web page is secure.
9. (Currently Amended) A computer system comprising:
  - a bus;
  - a memory unit coupled with said bus; and
  - a processor coupled with said bus, said processor for executing a method for analyzing content on a web page comprising:
    - receiving a request for a web page;
    - generating a web page on a server;
    - processing the web page through a filter, wherein the filter transfers content of the web page to an analyzer~~[[,]]~~; ~~said analyzer~~

analyzing the content of the web page, wherein said analyzing is distinct from said processing; and  
returning a result of said analyzing to said server; and  
appending the result of said analyzing to the content of said web page.

10. (Original) The computer system of Claim 9 wherein said server is an application server operating on a first computing system.
11. (Original) The computer system of Claim 10 wherein said filter is a function of the application server.
12. (Original) The computer system of Claim 10 wherein said server and said filter operate on said first computing system.
13. (Original) The computer system of Claim 12 wherein said request for said web page is generated by a browser operating on said first computing system.
14. (Original) The computer system of Claim 10 wherein said analyzer operates on a second computing system that is communicatively coupled with said first computing system.
15. (Previously Presented) The computer system of Claim 9 wherein said analyzer analyzes said content of said web page for compliance with Federal law.

16. (Original) The computer system of Claim 9 wherein the filter transfers content of the web page to the analyzer in a hypertext mark-up language (HTML) format.

17. (Currently Amended) A computer-usable medium having computer-readable program code embodied therein for causing a computer system to perform a method for analyzing content on a web page, said method comprising:

accessing said web page comprising content;

processing the web page through a filter, wherein the filter transfers the content of the web page to an analyzer;

analyzing the content of the web page at said analyzer, wherein said analyzing is distinct from said processing;

returning a result of said analyzing to a server;

appending the result of said analyzing to the content of said web page;

and

displaying said web page and said result.

18. (Original) The computer-usable medium of Claim 17 wherein said generating of a web page comprising content is performed by an application server operating on a first computing system.

19. (Original) The computer-usable medium of Claim 17 wherein said filter is a function of the application server.

20. (Original) The computer-usable medium of Claim 18 wherein said server and said filter operate on said first computing system.

21. (Original) The computer-usable medium of Claim 18 wherein a request for said web page is generated by a browser operating on said first computing system.

22. (Original) The computer-usable medium of Claim 18 wherein said analyzer operates on a second computing system that is communicatively coupled with said first computing system.

23. (Previously Presented) The computer-usable medium of Claim 17 wherein said analyzer analyzes said content of said web page for compliance with Federal law.

24. (Original) The computer-usable medium of Claim 17 wherein the filter transfers content of the web page to the analyzer in a hyper text mark-up language (HTML) format.
